

## *Exercises and Drills*

We offer a selection of Table Top, Response City, and live drills. These can be customized to your site and location. We have the following equipment that is available for these exercises and drills:

CAER Car - a rail car that is constructed with multiple high pressure and low-pressure fittings for hands on leak repair.

CAER Containers - a series of tank trucks and intermodal containers that are made to leak.

Response City - a portable city/ airport that can be used for miniature scaled scenario exercises such as terrorist incidents, derailments, industrial accidents and transportation incidents.

Table Tops - exercises based on real incidents for local situations.
